-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-5 and 15-18, drawn to an apparatus and method of connecting and securing a unit dose pack.

Group 2, claim(s) 6-11, drawn to a foldable blister pack mounting card.

Group 3, claim(s) 12-14, drawn to a blister pack mounting card.

Group 4, claim(s) 19-24, drawn to a mounted blister pack and method of mounting.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The problem to be solved by the first invention can be construed as to provide a child- resistant apparatus. The feature which solves this problem is the provision of a frame having a locking element which engages and secures the cover.

The problem to be solved by the second invention can be construed as to provide a blister pack mounting card which enables the mounting of two blister packs.

Art Unit: 3728

The feature which solves this problem is the provision of a second fold-over panel with a blister pack mounted to the second panel.

The problem to be solved by the third invention can be construed as to provide a blister pack mounting card that can be used in combination with a reusable container.

The feature which solves this problem is the provision of a blister pack mounting card comprising means suitable for detachably connecting the card to an appendage.

The problem to be solved by the fourth invention can be construed as to stiffen a blister pack in such a way that the products contained in the blisters can be easily dispensed. The feature which solves this problem is the provision of a blank panel with at least an aperture, wherein the blister pack is mounted on the panel such that the blister is aligned with the aperture.

Since the problems to be solved by the four inventions and the features which solve these problems are different, the different technical features cannot be construed to be corresponding special technical features as required by PCT Rule 13.2 and the application does not comply with the requirements of PCT Rule 13.1 for Unity of Invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 3728

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

An attempt to telephone Alexandra Urban on 14 April 2009 to request an oral election to the above restriction requirement was unsuccessful.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Gregory Pickett whose telephone number is 571-272-4560. The examiner can normally be reached on Mon-Fri, 11:30 AM - 8:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on 571-272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
